1. Achievements since last week:

STT	Description	Due Date	Responsibility	%Complete
1	Revised use-case model and use-case specification	29/07/2024	Thảo, Khôi	100
2	Software Architecture Document	29/07/2024	All members	100
3	Database configuration	29/07/2024	Khôi	60
4	Wrap up implementation	29/07/2024	All members	100

2. Issues and impacts:

1. **Problem in writing the software architecture document:** Our team faced significant challenges in writing the software architecture document because the MVVM model applied in the application was rather new and was not covered in the in-class lectures. We spent considerable time researching and understanding the principles of MVVM, which led to delays in our documentation process. To resolve this, we looked up information about MVVM, watched lectures and tutorials online to build a foundational understanding, and then applied this knowledge to our documentation. This approach allowed us to effectively document the software architecture, ensuring clarity and consistency in our development process.

3. Next week's goals:
